Recycling and Garbage Services.

Composting & Recycling is Now the Law for California Residents

Properly sorting your food scraps and other compostable materials not only helps fight climate change, it's now the law. Effective January 2022, State law (SB 1383) requires residents and businesses to keep compostable and recyclable materials out of California's landfills. When compostable materials like food scraps, plant trimmings, and paper break down in a landfill they produce methane, a potent greenhouse gas that contributes to climate change. By composting and recycling these materials, you're helping to reduce methane emissions and create a healthier planet.
